

RI TRANSPARENCY REPORT 2019

Swedfund International AB

An investor initiative in partnership with UNEP Finance Initiative and UN Global Compact

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the <u>PRI website</u>, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. In no case, can this report or any content of it be sold to other parties.

Third party organisations who have accessed Transparency reports outside of the Data Portal and intend to use those require the prior written consent of PRI (other than for internal use or research or for the sole benefit of the organisation whose report this refers to).

63% of Swedfund's investments are in Africa, primarily in Sub-saharan Africa. Please see Swedfund's Integrated Reporting 2018 for detailed information on the market division of Swedfund's portfolio.

The DAC List of ODA Recipients shows all countries and territories eligible to receive official development assistance (ODA). These consist of all low and

middle income countries based on gross national income (GNI) per capita as published by the World Bank, with the exception of G8 members, EU members, and countries with a firm date for entry into the EU. The list also includes all of the Least Developed Countries (LDCs) as defined by the United Nations (UN). (A significant number of countries Swedfund invests in are not included in MSCI's country classification, and thus a heavy exposure falls out on 'Other markets' according to this classification).

As a development finance institution, Swedfund has a special role to play both within Swedish aid and as a catalyst for achieving Agenda 2030. We invest in shares, provide loans and utilise funds as instruments to reach out to more small and medium-sized enterprises. Our business model is based on three pillarspillars: Impact on society, Sustainability and financial viability. By establishing development targets and working closely with our portfolio companies, we can monitor developments and ensure that they evolve in the right direction.

Impact on society - Swedfund aims to help create jobs with a good working environment and good employment conditions.

• Job creation

- Tax
- Share of women in senior management
- CO2e emissions
- Additionality
- Overall impact/benefit

Sustainability - Swedfund aims to help create sustainable enterprises in the world's poorest countries.

- Environment/climate
- Human rights and working conditions
- Business ethics and anti-corruption

Financial Viability - Swedfund aims to help create enterprises that are profitable in the long-term and therefore financially viable in the world's poorest countries.

- Growth
- Profitability
- Return on equity

Regarding the selection, appointment and monitoring of investment managers Swedfund sets similar criteria as those for internally managed investments:

Investing in countries with less developed economies and enterprises brings with it major risks, particularly financial risks. We endeavour to manage these risks through a comprehensive investment process. The investment proposals that we receive are first reviewed, and those which match our investment strategy and criteria are then analysed in more detail.

Investment managers and analysts, working alongside experts in ESG, law and impact, conduct a thorough analysis. Business plans, investment partners, sustainable development (environment, employment conditions and anti-corruption) and impact on society are all analysed. The analysis is then reviewed by Swedfund's Investment Committee and the process is concluded with a decision by the board of directors. Each investment must achieve the goals set in our

three pillars: impact on society, sustainability and financial viability

Swedfund encourages the following:

- Adhere to internationally recognized standards for
 - sustainability;
 - business integrity
 - anticorruption;
 - corporate governance; and
 - human rights, for example: UN GC, IFC Performance Standards, OECD-guidelines for MNE
- Adopt and implement a whistleblowing service in order to make it easy to anonymously report serious irregularities.

Swedfund requires the following:

- Comply with legal and regulatory requirements.
- Comply with ILO's Core Conventions and ILO's Basic Terms and Conditions of Employment.
- Comply with the Harmonized EDFI Exclusion List.
- Adhere to applicable IFC Performance Standards.
- Adhere to Swedfund's requirements on anti-corruption.
- Provide ESG information (including human rights) and on development results, as requested by Swedfund.
- Comply with Swedfund's requirements with respect to Swedfund's monitoring of its investments.

For the detailed requirements, please find Swedfund's sustainability policy (SG 02.1). In addition to the above mentioned norms our RI policy also includes: EDFI Exclusion List, EDFI Guidelines for OFCs, EDFI Harmonized Environemental and Social Standards

For additional information on Swedfund's investment principles, overall investment strategy, and responsible investment approach please see SG 01.4 and SG 01.5.

CRITICAL PARTS OF OUR BUSINESS MODEL

Our business model integrates the global goals through our three pillars. But it also manages risks, the inputs we make and the investments we take on.

RISK

As a development finance institution, risk is pivotal to our business. Swedfund invests in countries and areas where the risks are more numerous and potentially more serious than they are in developed markets. Accepting risk is part of our mission – to improve the living conditions of people in poverty by creating sustainable businesses and decent jobs in developing countries.

Swedfund invests in places in the world where, although there is strong need for foreign capital, private investors often consider the risks to be too high. Consequently, our greatest risks lie in our investments. Risk management is therefore an equally natural part of our business as it is in our portfolio companies.

The more sustainable and advanced companies Swedfund can join forces with and build, the better the outcomes for the community in which they operate. In its operations, Swedfund is exposed to many different factors that are difficult to influence. We manage risks at different levels: strategic, investment, operational and financial. Sound risk management is both a prerequisite for the business and a potential way of improving development results.

TIME PERSPECTIVE

We always invest with a long-term perspective, usually between 7 and 10 years. A vital long-term objective for our investments is that they must always contribute to realising Agenda 2030. Our strategic sustainability goals relate to a three-year period, which is the medium term for us. Our long-term approach and sustainability are the source of an important part of our additionality and enable us to act as a catalyst. Our long investment cycle also means that we have a portfolio, which combines investments from 2005 and onwards. Earlier investments were made in line with a partially different mission and our working methodology then also differed from our current approach.

GEOGRAPHY

Our mission is to invest in operations and countries which qualify for development financing in accordance with the OECD/DAC's definition. We prioritise investments in the least developed countries and in low-income countries, and also invest in post-conflict countries. We shall invest where the need is greatest, but our new owner directives also give us the opportunity in exceptional cases to invest in upper medium-income countries. One example of an exception may be investment in renewable energy in an upper middle-income country, with the aim of reducing CO2emissions. This kind of investment benefits poorer countries, where climate change may have the most severe consequences.

Our sustainability focus areas

- Decent work
- Environment& Climate
- Gender Equality
- Anticorruption& Business Ethics
- Human Rights
- Tax

SECTORS

Our three priority investment sectors are Renewable energy, Financial institutions and Funds, and Healthcare

1. Financial institutions & Funds

The finance sector is viral for a country's economic and social development. Lack of access to finance is one of the greatest limiting factors in businesses' ability to grow in developing countries. Swedfund finances banks and funds in under-financed markets, and this enables them to increase their financing and lending to businesses and entrepreneurs. Our ambition is to help build a finance sector which is inclusive with particular focus on women entrepreneurs and owners of small businesses.

2. Energy & Climate

Entrepreneurs in developing countries cite deficiencies in electricity supply as another major obstacle in running and developing their operations. Swedfund invests in renewable energy since the development of climate-friendly energy is one way of accelerating progress towards Agenda 2030.

3. Healthcare

During 2018, Swedfund adopted a new focus sector, Health. However, investments in the health sector have been taking place for many years and the encouraging development results that these investments have contributed to have led to health becoming a separate sector. Many of the investments within health are made in the form of share investments. In many cases, Swedfund is a shareholder who also plays an active role on the board of directors. This gives us an opportunity to support the enterprise's development by contributing our experience and special focus on sustainable development.

• OECD - Managing Conflict of Interest in the Public Service

CFA Institute - Code of Ethics and Standards of Professional Conduct

In addition to the above there is also so-called deli conflict of interest (Sw. delikatessjäv), i.e. situations where there is a risk of impartiality other than those specified in the law. Those consist of irrelevant considerations due to friendship or hostility. This situation can also arise in family situation, in relation to husband/ wife, or partner, children, grandchildren, siblings, parents, minors under guardianship, etc.

	companies on climate and have built in model based on the Greenhouse Gas Protocol (the GHG protocol). The methodology is supporting the work we are carrying out with respect to the environment and climate, under which our portfolio companies have been reporting their water electricity and energy consumption already for some time. To ensure that the data we receive in our model is as relevant as possible, we surveyed our direct investors through separate climate questionnaires when building the emission calculation model. We supplemented this information with the purchased sector data. Measuring climate data can pose challengesresulting from the fact that sector information is based on industrialised countries and not on developing countries, and the estimates included in the measuring methods.
	Total CO2e emissions from Swedfund's portfolio in 2017 were about 24 thousand tons compared with about 35 thousand tons in 2016. For further information, please see our Integrated Reporting 2018.

	Gender equality
	Key performance indicator
	Share of female employees / in management / in boards in our portfolio

Share of female employees 2017; 40% (2016:42%, 2015; 33%) Share of women in management positions 25% (2016:22%, 2015: 21%) Share of women in boards 16% (2016:17%, 2015: 20%) For the fourth consecutive year we are measuring and reporting the share of women employed in our portfolio companies (including investment funds and their holdings), and the women in management positions and on company Board of Directors in our Integrated Report 2018. For further information, please see our Integrated Reporting 2018. Disclosure is part of our work on gender equality. Other, specify (2) Job creation A growing number of jobs within Swedfund's portfolio companies Net increase of number of jobs in our portfolio companies (comparable units) amounted to about 8600 jobs, 8%, between 2016 and 2017 Through its investments Swedfund supports a total of about 167 000 direct job opportunities (2016: about 121 000, 2015: about 106 000). Direct jobs also generate a large number of indirect jobs. According to the model that Swedfund works with (aligned with CDC), each direct job opportunity generates an average of 7.5 indirect job opportunities. Other, specify (3) □ None of the above Results achieved in relation to strategic sustainability targets Sustainability target: Adherence to ILO Core Conventions Regarding the status of adherence to ILO Core Conventions in Swedfund's portfolio, we have divided our portfolio companies in three categories, to better reflect our targets and requirements. The figures below present the share of the companies that adhere to ILO Core Conventions in each category at the end of 2017: Portfolio companies less than three years in Swedfund's portfolio: 88% Portfolio companies more than three years in Swedfund's portfolio: 77% Portfolio companies in Exit phase: 50% Sustainability target: ESG Management System Swedfund aims to contribute to the creation of businesses which are viable in the long term, and therefore requires portfolio companies to establish a management system for environmental and social issues. In conjunction with the initial analysis of a prospective investment, an assessment is made to determine whether a management system is in place. If this is not the case, the scope to bring about improvements is evaluated. If Swedfund opts to proceed with an investment, the requirements for improvements are tied to the financial conditions for the disbursement of funds. A sustainable development policy must be established and adopted by the management of the portfolio companies. The sustainable development policy lays the foundations for the way in which a business must approach sustainable development, and it is vital that it does not simply become a desk exercise, but is also implemented in the portfolio companies' operations. The implementation of a management system for sustainability issues is an important step to ensure that the policy is implemented and established To determine whether a portfolio company meets the strategic sustainability goal, Swedfund uses monitoring to determine whether the portfolio company has implemented a management system and, if so, whether it includes the relevant components SUSTAINABILITY_POLICY A sustainability policy must be established and adopted by the management of the portfolio companies • IDENTIFICATION OF RISKS AND IMPACTS A system/routine must be established in order to identify sustainability risks and the areas that are affected • PERFORMANCE MANAGEMENT The company's results within identified risks and impact areas must be continually monitored and evaluated in order to measure and improve results over time. • RESPONSABILITY AND COMPETENCE A member of the company's management team must have overall responsibility for sustainable development issues. EMERGENCY PREPAREDNESS In the case of fixed installations, action plans must have been established for accidents and disaster situations. • REPORTING Reporting must take place regularly and at least annually both to the management and to the board of directors of the portfolio company, as well as to Swedfund. • STAKEHOLDERS Internal and external stakeholders must be identified and consulted in situations which affect them and be given relevant information at appropriate times and intervals Regarding the status of implementation of Environmental and Social Management System (ESMS) in Swedfund's portfolio, we have divided our portfolio companies in three categories, to better reflect our targets and requirements. The figures below present the share of the companies that have implemented an ESMS in each category at the end of 2017: Portfolio companies less than three years in Swedfund's portfolio: 94% Portfolio companies more than three years in Swedfund's portfolio: 68% Portfolio companies in Exit phase: 60% For more information, see our Integrated Report 2018. Sustainability target: Anti-corruption Management System Swedfund's portfolio companies undertake in agreements to adopt and implement a management system to handle anti-corruption issues Regarding the status of implementation of anti-corruption management system in Swedfund's portfolio, we have divided our portfolio companies in three

Regarding the status of implementation of anti-corruption management system in Swedfund's portfolio, we have divided our portfolio companies in three categories, to better reflect our targets and requirements. The figures below present the share of the companies that have implemented such a system in each category at the end of 2017:

Portfolio companies less than three years in Swedfund's portfolio: 78% Portfolio companies more than three years in Swedfund's portfolio: 64% Portfolio companies in Exit phase: 50%

For more information, see our Integrated Report 2018.

INVESTMENT PROCESS

Initial assessment

Swedfund annually evaluates a wide variety of investment proposals. The initial assessment examines whether the proposal is consistent with our investment strategy and criteria, and how our investment can contribute to attainment of the global goals. We carry out an overall evaluation of the country, the business and its business plan, strategic partners and our potential role. In every investment that we make, our role must be additional, which means that we provide resources which are crucial to the development of the business that would otherwise not have been available.

Concept clearance

After the initial assessment, the investment team draws up a proposed decision, the "concept clearance", which is then presented to Swedfund's Investment Committee. Swedfund's Investment Committee, which has both an advisory and a decision-making role, decides whether to proceed with the investment proposal and carry out an in-depth analysis. The Investment Committee is chaired by Swedfund's CEO and includes an investment manager, a director of strategy & communication, a director of special operations, a chief lawyer and a senior expert in sustainable development. The investment Committee and the investment team discuss the key risks in the investment which must be analysed during the due diligence process.

Due diligence

If the committee decides to proceed, the investment proposal will proceed with a due diligence. A thorough analysis is then carried out in which many different factors are examined, including the business concept, business plan, market, financial history and forecast, investment calculation, partners, legal aspects, expected societal development results and sustainability risks and impacts, including the environment, employment conditions, human rights and corruption. During the due diligence phase, the investment team meets representatives of different functions of the company in order to gain a deeper understanding of the company and the processes, routines and documents that they have shared with Swedfund. If necessary, external expertise is hired to examine specific issues. Before the meeting, the company will be asked to complete a comprehensive questionnaire on environmental, social and corporate governance related issues. The due diligence process forms the basis for the information that is used in the decision-making process. This includes an ESG Action Plan (ESGAP), which sets out the applicable requirements and also forms part of the investment agreement. It describes the changes or actions that the company need to implement in order to meet Swedfund's sustainable development requirements.

Screening

When the due diligence process is completed, a screening meeting will take place during which the Investment Committee will decide whether the investment meets our requirements and is ready to be presented to Swedfund's board of directors. If the investment is not approved at this stage, it may be because new information came to light during the due diligence process. It is not uncommon for new questions to be raised, which the team then examines in the final stage of the due diligence process. From 2018 onwards, we have also established a clear strategy for exiting investments.

Decision by the board of directors

The initial phase is concluded with the investment team presenting the investment proposal to Swedfund's board of directors, which then reaches a decision. If the investment is given the go-ahead, an agreement will be negotiated. The investment agreement includes not only legal conditions, but also sustainability and reporting requirements.

Active ownership

Once the agreement has been signed and the funds have been disbursed, the work that was begun earlier during the investment phase will continue. We work actively and continuously with our portfolio companies, focusing on commercial and sustainability issues which were identified during the due diligence phase. During the period for active management, which usually extends over 7-12 years, an ongoing dialogue and close contact are maintained with the portfolio companies in order to monitor their performance, goal attainment and contractual conditions, both through visits, active board work and dialogue and through their annual report (the Swedfund Sustainability Report). Both internal audits and third-party audits are conducted. The Senior Investment Manager is responsible for following up and ensuring that the companies comply with the agreed conditions, relevant parts of our policies and ESGAP. Within a three-year period from the date of disbursement, companies must achieve Swedfund's strategic sustainability goals. To help companies attain these goals, we can allocate funds in the form of Technical Assistance (TA), which can for example be used for training or consultancy.

Exit phase

Swedfund is a long-term financing institution, but it is not a permanent owner. We end the investment and the partnership either through selling our shareholding, through repayment of the loan or through expiry of a fund's term.

The exit phase generally starts when Swedfund considers the goals that were established for the investment to have been achieved or when we cease to be 'additional'. Selling a portfolio company on the markets in which Swedfund operates is not the same as selling a company in Europe. Much more effort is required, as established processes are often lacking. In most cases, custom solutions are necessary in order to find a buyer and Swedfund often plays an active role in finding a solution in this context.

Ahead of the exit process, the portfolio company is analysed on the basis of Swedfund's three pillars. During this process, we consider whether further initiatives are necessary. An exit report is prepared for each closure, where we analyse what we have learned and what relevant knowledge and experiences we can take with us into future investments. The report will also clearly explain how the investment has taken into account our three pillars. Everything in one step to ensure a responsible exit.

SG 14.5 Additional information [Optional]	
Swedfund strives to minimise negative climate impact in all its investments. Initiatives relating to the environment and climate form an integral par investment process based on Swedfund's sustainable development policy and separate stance regarding the environment and climate. Climate is of thematic areas to be considered before decisions are taken concerning new investments regardless of sector, geography or instrument. In 2015, S decided to focus solely on investments in renewable energy, thus excluding investments in fossil energy generation.	one of tw

TRANSPARENCY

CO2-model

Swedfund uses a model to estimate CO2e which has been developed by an external supplier and is based on the Green House Gas Protocol (GHG Protocol). In the model, the CO2e exposure of investments is weighted based on Swedfund's owner stake in the portfolio company. In cases where Swedfund acted as lender, the determination of Swedfund's share is based on the outstanding loan's share of the portfolio company's balance sheet total and, in the case of lending to banks, the size of the loan relative to the bank's total borrowing. The calculation presented below consists of Swedfund's portfolio companies, including the underlying holdings of the funds and the co-financing facilities, a total of 156 investments in 2017 (147 investments in 2016). Emissions from Swedfund's portfolio amounted to 24 thousand tonnes in 2017 (2016: 35 thousand tonnes). Amonast Swedfund's investments. those which produce energy, including a gas-fired power station, have the greatest impact on the climate. These holdings account for approximately 60% of all emissions in the calculation. As Swedfund has opted to continue investing exclusively in renewable energy, CO2e exposure from Swedfund's investments is expected to decrease over time.

Climate report

During the year Swedfund has also conducted an analysis of how climate and environmental risks impact Swedfund's investments and, in turn, how they can impact Swedfund's financial position. The analysis summarises the key environmental risks in the investment portfolio and how Swedfund works to manage and mitigate them. To analyse how the climate risks that have been identified could impact Swedfund's financial position, Swedfund has developed a method to take into account of the climate risks and the requirements concerning mitigation that Swedfund imposes on portfolio holdings. The degree of impact on Swedfund's financial position is based on the reasoning that a low climate risk will entail a low financial risk, and correspondingly for medium and high climate risks. Swedfund's risk profile is analysed from a "top-down" and "bottom-up" approach. "Top-down" analyses and categorises the external climate risks the portfolio is exposed to. "Bottom-up" includes Swedfund's investment process, i.e. the identification and management of environmental and climate-related risks in the portfolio, as well as CO2e emissions from investments.

Swedfund's environment and climate risk profile is largely influenced by three factors: The region in which the activity takes place, the sector in which the activity is taking place and the size of Swedfund's shareholding or loan. The climate risks in Swedfund's focus regions, Africa and Asia, are relatively high at a general level. At the same time, the risk level in the three sectors in which Swedfund focuses its investments in are categorised as low, with the exception of investments in renewable energy. The choice of instruments further balances the risk, given Swedfund's management of environmental and climate-related risks during the screening prior to an investment, as well as measures during the active ownership phase.

The analysis shows that Swedfund's business model adequately addresses environmental and climate-related risks, partly through the work relating to the environment and climate being carried out within the portfolio companies. The focus sectors which have been established in the business model are sectors which have relatively low environmental and climate risk exposure, and by following the business model, the exposure of Swedfund's operations and investments to environmental and climate risks is maintained at a limited level. The exception is the energy sector, where the risk is considered to be medium.

At the same time, the Energy & Climate sector is the sector in which Swedfund has identified the greatest opportunity to have a positive impact through its decision to exclusively invest in renewable energy. The investments that Swedfund make in the world's poorest countries also help reduce the overall risk of climate change, partly through Swedfund's efforts to identify sustainable solutions through addressing and implementing measures aimed at the environmental and climate-related challenges that Swedfund is facing in the countries in which the company invests.

Climate investment case from the past year - Climate Investor One

In June 2018, Swedfund invested USD 15 million in the CIO Construction Equity Fund. Access to sustainable energy is a prerequisite for effective poverty eradication, which is the overarching reason why Swedfund is investing heavily both in the sector itself and in broader climate investments. Another factor behind the investment in CIO is that we want to work to increase capital flows from the private sector for sustainable climate projects in developing countries, and we believe that Swedfund can act as a catalyst for private investment. It is hoped that CIO will be able to serve as a good example of how financing facilities can be structured in order to attract different types of capital and contribute to a marked increase in sustainable energy generation in developing countries

What makes CIO unique is that it offers tailored financing throughout the life-cycle of a project, with the overarching aim of developing renewable energy generation at a faster pace. The facility is based on the knowledge that different stages of a project's life-cycle require different types of capital from different types of financing institutions. A structure has therefore been constructed for what is known as 'blending instruments', which consequently also means that different investors are able to participate according to their own risk profile.CIO encompasses three separate but operationally interlinked funds.

 PRI 1

 FI 07.1
 Indicate what proportion of your thematic investments are:
 Social/SDG bonds linked to environmental goals
 Social/SDG bonds linked to social goals
 Social/SDG bonds linked to social goals
 Social/SDG bonds linked to social goals
 Sustainability/SDG bonds (combination of green and social linked to multiple SDG categories)
 Social for the social goals
 Sustainability/SDG bonds (combination of green and social linked to multiple SDG categories)

Specify

Swedfund does not invest in bonds but we encourage transperency and disclosure of information in all investments we do. Therefore we were recommended by the PRI to report on the section for bonds where applicable, although we do not invest in bonds. The disclosure principles under the green bonds principles can be applied to our investments. Please see the following sections: 00 11.4 about Swedfunds mission and investment

modell standing on three pillars. SG 01-02 about international norms applicable to all Swedfund's investments, including private quity. SG 05-06 about RI objectives and progress and reporting on Swedfund's Strategic Sustainability Goals. SG 07.2 about Swedfund's investment process, the use of ESG audits and action plans.

Describe your organisation's approach to thematic fixed income investing Swedfund does not invest in bonds but we encourage transperency and disclosure of information in all investments we do. Please refer to section 00 11.4 for more details around Swedfund's mission and business model based on the three pillars: Social impact, sustainability and financial viability - which is applied in all our engagements. PRI 1 Indicate whether you encourage transparency and disclosure relating to the issuance of themed bonds as per the Green Bonds Principles, Social Bond Principles, or Sustainability Bond Guidelines We require that themed bond proceeds are only allocated to environmentally or socially beneficial projects U We require the issuer (or 3rd party assurer) to demonstrate a process which determines the eligibility of projects to which themed bond proceeds are allocated 🛛 We require issuers to demonstrate a systematic and transparent process of disbursing themed bond proceeds to eligible projects until all funds are allocated U We require issuers to report at least once per year on the projects to which proceeds have been allocated including a description of those projects ☑ Other, specify Swedfund does not invest in bonds, but the disclosure principles under the green bonds principles can be applied to all our investments. None of the above Describe the actions you take when issuers do not disburse bond proceeds as described in the offering documents. Swedfund does not invest in bonds but we encourage transperency and disclosure of information in all investments we do. Therefore we were recommended by the PRI to report on the section for bonds where applicable, although we do not invest in bonds. The disclosure principles under the green bonds principles can be applied to all our investments. Please see the following sections: 00 11.4 about Swedfunds mission and investment modell standing on three pillars. SG 01-02 about international norms applicable to all Swedfund's investments, including private quity. SG 05-06 about RI objectives and progress and reporting on Swedfund's Strategic Sustainability Goals. SG 07.2 about Swedfund's investment process, the use of ESG audits and action plans. Indicate how you assess the environmental or social impact of your thematic investments. 🗹 We require issuers to report at least once per year on specific environmental or social impacts resulting from our themed investments 🗹 We ensure independent audits are conducted on the environmental or social impact of our investments U We have a proprietary system to measure environmental and social impact 🗹 We measure the impact of our themed bond investments on specific ESG factors such as carbon emissions or human rights 🗹 Other, specify Please see 0.0114 and SG 01.4-5 about Swedfundss mission and business model and SG 01 about international norms None of the above PRI 1 Describe your approach to integrating ESG into traditional financial analysis Please see section 00 11.3 about Swedfunds mission and investment modell standing on three pillars Please see section SG 01 about international norms applicable to all Swedfund's investments, including private quity. Please see section SG 05-06 about RI objectives and progress and Swedfund's Strategic Sustainability Goals. Please see section SG 07 about Swedfund's investment process, the use of ESGAP and audit plans Describe how your ESG integration approach is adapted to each of the different types of fixed income you invest in. Swedfund applies the same approach/principles regardless the type of investment, hence the same approach is applied for direct private debt and loan investments (fixed income) as for direct or indirect equity. Please refer to guestion FI 11.1 for further details PRI 1 Indicate how ESG information is typically used as part of your investment process. Corporate (nonfinancial) ESG analysis is integrated into fundamental analysis ESG analysis is used to adjust the internal credit assessments of issuers ESG analysis is used to adjust forecasted financials and future cash flow estimates. ESG analysis impacts the ranking of an issuer relative to a chosen peer group.

An issuer's ESG bond spreads and its relative value versus its sector peers are analysed to find out if all risks are priced in.

The impact	of ESG analysis on bonds of an issu	uer with different durations/maturities are ar	alysed.	
· · · · · · · · · · · · · · · · · · ·	Sensitivity analysis and scenario analysis are applied to valuation models to compare the difference between base-case and ESG-integrated security valuation.			
ESG analys	ESG analysis is integrated into portfolio weighting decisions.			
Companies	Companies, sectors, countries and currency and monitored for changes in ESG exposure and for breaches of risk limits.			
The ESG pr	ofile of portfolios is examined for ser	curities with high ESG risks and assessed rel	ative to the ESG profile of a benchmark.

.2 Describe the nature of these improvements and provide examples (if any) from the reporting year

Compliance with ILO Core Conventions and Basic Terms and Conditions of Employment, implementation of Environmental Management and/or Social Management Systems as well as implementation of an Anti-Corruption Management System. All investment are assessed based on above mentioned criteria and any gaps identified are included in an ESG Action Plan that will be included in the contract. For more detailed information please refer to:

- 00 11.4 about Swedfunds mission and investment modell standing on three pillars.
- SG 01 about international norms applicable to all Swedfund's investments, including private equity.
- SG 05-06 about RI objectives and progress and Swedfund's Strategic Sustainability Goals.
- SG 07.2 about Swedfund's investment process, the use of ESG audits and action plans

One person in the portfolio company's management shall have the ultimate responsibility for Sustainable Business Development. Competence to manage environmental and social issues as well as an Anti-Corruption policy should be implemented and maintained through continuous education for relevant staff.

During the reporting year, we have for example asked a fund manager to conduct a gender assessment and create a plan that would aim to improve the gender balance at the fund manager and in the portfolio.

O We do not set expectations for portfolio companies on ESG-related considerations

7.3 Additional information. [OPTIONAL]

DECENT WORK

- Through investment in the private sector where the majority of all jobs in our markets are generated we help create more jobs.
- During our Due Diligence, we look at whether the company complies with the ILO's core conventions and the ILO's basic terms and conditions of employment. If deficiencies are identified, these are addressed through an ESGAP (Environmental Social Governance Action Plan), with a set target date for rectifying the situation. ESGAP forms a part of the investment agreement with the portfolio companies.
- By developing financially sustainable businesses, we create the conditions for continued and additional employment in companies that survive and progress.
- We measure the number of jobs in our portfolio companies, and one of our objectives is that they shall increase over time.

GENDER EQUALITY

- Swedfund invests in companies that have employing women as an explicit goal.
- · We invest in banks, which focus on lending to women.
- In our Due Diligence when evaluating an investment, we analyse the company's approach to equality and non-discrimination, such as the availability
- of parental leave and equal pay for equal work. We start from the ILO's core conventions and the ILO's basic terms and conditions of employment. • Through Women4Growth, a talent development programme for women employed in our portfolio companies, we make targeted interventions to
- strengthen them in a professional role and to further develop them to achieve leading positions.
 We set requirements and constantly measure key ratios linked to compliance with the ILO's core conventions and the ILO's basic terms and conditions of employment..and genderequality in the form of proportion of female employees, female in leading positions and on the Board of Directors

This way we highlight women in our data. We know that what is measured is visible - and highlighting facts is the start of change!

THE ENVIRONMENT & CLIMATE

- In our Due Diligence in preparation for an investment, we analyse the company's resource utilisation and impact on the environment
- We work actively to minimise resource use and negative environmental impact. We place requirements on the implementation of environmental and social management systems within three years from the date of the investment.
- Swedfund focuses in its investment in the production of renewable energy.
- DFIs fulfil an important role as sources of finance in the early stages of high-risk energy projects. In this, we act as catalysts and accelerate private investment within the renewable energy sector in Africa.
- We set requirements on and measure the degree of implementation of environmental and social management systems in our portfolio.
- We measure GWh of renewable electricity generated and monitor energy and water consumption of our direct investments.

TAX

- Tax forms part of Swedfund's Due Diligence. This means that, in preparation for an investment, we review the project and its structure from a tax perspective. Swedfund will not, for example, invest in corporate structures which lead to unjustified profit transfers from the operating country to another country, leading to an unbalanced tax situation. We also require that our portfolio companies submit reports on their tax situation. In the course of its normal activities, Swedfund will encourage its portfolio companies to act responsibly on taxation matters.
- Swedfund reports the taxes reported by portfolio companies in its annual report, and aims to record information on the amount of tax paid by the companies, using a harmonised definition.
- We also report the amount of tax which our portfolio companies declare in their annual reports in an aggregate country-by-country report.
- The Chief legal Counsel and Investment Managers are responsible for tax issues in portfolio companies.

HUMAN RIGHTS

- Swedfund's responsibility to respect human rights has been long enshrined in the guidelines and duties that guide us. These include Sweden's national
 action plan for business and human rights, the state's owners' policy, the UN's Global Compact and the OECD's guidelines. In 2014, we began the
 implementation of the UN Guiding Principles on Business and Human Rights.
- Human rights are an integral part of the Due Diligence which covers all our new investments

ANTI-CORRUPTION

- Swedfund aims for zero tolerance to all forms of corruption. There is a high prevalence of corruption in Swedfund's markets. In the event of a serious case of corruption, Swedfund ultimately has the right to withdraw from the investment.
- In every Due Diligence carried out on all new investments, corruption risks are analysed, as is the company's approach to combating corruption. For each direct investment, an ESG Action Plan is drawn up, with measures to ensure that the companies comply with Swedfund's Sustainability policy and Anti-corruption policy.
- To make things easier for the portfolio companies, Swedfund has produced a template for an anti-corruption policy, which portfolio companies are welcome to use.
- Education and skills development on anti-corruption issues, internally and in portfolio companies, are another important component of Swedfund's anti-corruption work.
- Swedfund requires that portfolio companies implement a management system in respect of anti-corruption issues. This is one of Swedfund's strategic sustainability goals.

		the portfolio companies resoluting and management of Location there are viable in the long term, and therefore requires portfolio c	
man dete	agement system for environmental and social issues. In co rmine whether a management system is in place. If this is n	njunction with the initial analysis of a prospective investment, a of the case, the scope to bring about improvements is evaluate s are tied to the financial conditions for the disbursement of fu	an assessment is made ed. If Swedfund opts to
the f		oted by the management of the portfolio companies. The susta sustainable development, and it is vital that it does not simply	become a desk exercise

tfolio company has implemented a management system and, if so, whether it includes the relevant components:

- SUSTAINABILITY POLICY A sustainability policy must be established and adopted by the management of the portfolio companies.
- IDENTIFICATION OF RISKS AND IMPACTS A system/routine must be established in order to identify sustainability risks and the areas that are affected.
- PERFORMANCE MANAGEMENT The company's results within identified risks and impact areas must be continually monitored and evaluated in order to measure and improve results over time.
- RESPONSIBILITY AND COMPETENCE A member of the company's management team must have overall responsibility for sustainable development issues.
- EMERGENCY PREPAREDNESS In the case of fixed installations, action plans must have been established for accidents and disaster situations.
- REPORTING Reporting must take place regularly and at least annually both to the management and to the board of directors of the portfolio company, as well as to Swedfund.
- STAKEHOLDERS Internal and external stakeholders must be identified and consulted in situations which affect them and be given relevant information at appropriate times and intervals.

However	Sometimes it is a challenge to make a partner adapt their activities to match Swedfund's requirements for sustainability and a positive impact on society. However, awareness and demands for sustainability are increasing. When Swedfund has decided to sell a portfolio company, it will be valued by an independent third party. The exit will be made on market conditions and there has to be a buyer. The best option is often to sell the shares to the company's main owner.					
investme increase has sold	ent terms. If a third party buys our s is the likelihood that the company v the company is unfortunately not	share, we will check the buyer to investig vill continue doing business in accordan something we can control. However, the	the deal: The buyer shall meet Swedfund's ambitions, goals ate that their activities are consistent with Swedfund's valu se with Swedfund's sustainability targets.
